In most instances, the Company, through its subsidiaries owns the assets essential to its operations. The major fixed assets are transmitters, microwave systems, antennae, buildings and electronic transmission, receiving and processing accessories and other wireless network equipment (including switches, radio channels, base station equipment, microwave facilities and cell equipment); coaxial and fibre optic cables, set-top terminals and cable modems, electronic transmission, receiving, processing, digitizing and distributing equipment, IP routers, data storage servers and network management equipment, microwave equipment and antennae; and radio and television broadcasting equipment (including television cameras, television and radio production facilities and studios). The operating systems and software related to these assets are either owned by the Company or are used under license.

The Company owns a Brampton office complex which was acquired on January 4, 2006. In addition, the Company owns service vehicles, data processing facilities and test equipment. Most of the Company's assets are held in its subsidiaries and are subject to various security interests in favour of lenders.

RCI's subsidiaries also lease various distribution facilities from third parties, including space on utility poles and underground ducts for the placement of some of the cable system and roof rights. The Company either owns or leases land for the placement of hub sites and head-ends and space for other portions of the distribution system. The Company also leases land and space on buildings for the placement of antenna towers and generally leases the premises on which its switches are located, principally under long-term leases. Rogers Wireless' wireless network reaches approximately 93% of the Canadian population and is located in all ten provinces. Rogers Cable's cable network is clustered in three key urban markets in Southern Ontario (Toronto, Ottawa, and the Guelph to London corridor), New Brunswick and Newfoundland.

On July 1, 2005, the Company acquired Call-Net, an integrated communications solutions provider of local, long distance and data services to more than 600,000 households and businesses across Canada. As a result of this acquisition, the Company now operates an extensive national fibre network with over 155 co-locations in major urban areas across Canada and also maintains network facilities in the U.S. and United Kingdom.

The Company owns or has licensed various brands and trademarks used in its businesses. Various of the Company's trade names and properties are protected by trademark and/or copyright. The Company maintains customer lists for its businesses. The Company's intellectual property, including its trade names, brands, properties and customer lists, is important to its operations.

Environmental protection requirements applicable to the Company's operations are not expected to have a significant effect on the Company's property, plant and equipment expenditures, earnings or its competitive position in the current or future fiscal years.

The Company and its subsidiaries have committed to material obligations under firm contractual arrangements, including commitments for future payments under long-term debt arrangements, capital lease obligations, operating lease arrangements and other commercial commitments. ITEM 7 — DESCRIPTION OF CAPITAL STRUCTURE

Item -7.1 — General Description of Capital Structure

Each Class A Voting share of RCI carries the right to fifty votes on a poll and may be voted at the meetings of shareholders of RCI. Holders of Class B Non-Voting shares and any series of preferred shares of the Company are entitled to receive notice of and to attend meetings of shareholders of RCI but, except as required by law, are not entitled to vote at such meetings. Under applicable Canadian securities laws, an offer to purchase Class A Voting shares of RCI would not necessarily require that an offer be made to purchase Class B Non-Voting shares of RCI.

The information required under the heading General Description of Capital Structure is contained in the 2005 Annual Audited Financial Statements, Note 13 is incorporated herein by reference.

Item -7.2 — Constraints

Restrictions on the Transfer, Voting and Issue of Shares

The Company has a direct or indirect ownership interest in a number of distinct Canadian undertakings which hold licences pursuant to applicable licencing legislation (the “Telecommunications Legislation”). The Telecommunications Legislation includes the *Broadcasting Act* (Canada), the *Telecommunications Act* (Canada) and the *Radiocommunication Act* (Canada).

The Telecommunications Legislation contains separate requirements relating to the level of foreign ownership that is permitted in respect of a given class of licenced undertaking. The Company believes that it, and each of its subsidiaries, have at all times been in compliance with all of the relevant ownership requirements of the Telecommunications Legislation.

In April 1996, the Governor in Council (i.e., the federal cabinet) issued a Direction to the Canadian Radio-television and Telecommunications Commission (the “CRTC”) respecting the ineligibility of non-Canadians to hold broadcasting licences, including licences to operate cable television undertakings. That Direction substantially harmonized the foreign ownership requirements under the *Broadcasting Act* with those under the *Telecommunications Act* and the *Radiocommunication Act*. The Direction was amended in 1997 to allow two non-Canadian controlled telephone companies to hold licences to operate cable television undertakings within their respective service areas. It was amended in July 1998 to clarify the restrictions relating to a holding company’s ability to control or influence the programming decisions of the licensee operating company.

The revised Cabinet Direction authorizes non-Canadians to own and control, directly or indirectly, up to 33 1/3% of the voting shares and up to 33 1/3% of the number of votes attached to the voting shares of a holding company which has a subsidiary operating company licenced under the *Broadcasting Act*. In addition, up to 20% of the voting shares and up to 20% of the votes attached to the voting shares of the operating licensee company may be owned and controlled, directly or indirectly, by non-Canadians. The chief executive officer and 80% of the members of the Board of Directors of the operating licensee company must be Canadian. In addition, the holding company and its directors are prohibited from exercising control or influence over the programming decisions of the licensee company, unless the holding company satisfies the ownership requirements which are applicable to the licensee company. There are no restrictions on the number of non-voting shares that may be held by non-Canadians at either the holding company or

licencee company level. The CRTC retains the discretion under the Direction to determine whether a given licensee is in fact controlled by non-Canadians.

The cellular, PCS and paging licenses held by the Company's indirect subsidiary, RWI, include a condition requiring the licensed carrier company to comply with the ownership restrictions set out in the *Telecommunications Act* and the *Radiocommunication Act*. A maximum level of 20% of the issued voting shares of the licensed carrier company may be owned by persons who are not Canadians. In addition, at least 80% of the members of the Board of Directors of the licensed carrier company must be Canadian. Pursuant to regulations promulgated under the *Telecommunications Act* and the *Radiocommunication Act*, a parent corporation may have up to 33 1/3% of its voting shares owned by non-Canadians. Neither the licensed carrier company nor the parent holding corporation (such as the Company) can be otherwise controlled by non-Canadians.

In order to ensure that the Company and any Canadian corporation in which the Company has a direct or indirect interest remains qualified to hold or obtain any cable television, broadcasting or telecommunications licence or authority to operate a similar undertaking pursuant to the Telecommunications Legislation and to ensure that the Corporation and any Canadian corporation in which the Company has an interest is not in breach of the Telecommunications Legislation or any licences issued to it or to any Canadian subsidiary, associate or affiliate of it under the Telecommunications Legislation, the existing Articles of the Corporation impose certain restrictions on the issue and transfer of the Company's shares and the exercise of voting rights attached thereto. A copy of the text of such restrictions may be obtained from the Secretary of the Company.

If in the opinion of the Board of Directors circumstances arise in the future that may jeopardize the ability of the Company and its subsidiaries to be qualified to hold and obtain licences in Canada, the restrictions on transfer, voting and issue of shares contained in the Articles of the Company will be invoked.

On November 19, 2002, the Minister of Industry announced that the Government of Canada will review the restrictions on foreign ownership applicable to the telecommunications sector. In February 2003, RWI appeared before the Parliamentary Standing Committee on Industry, Science and Technology and filed a brief in support of elimination of the restrictions. RCCI, another subsidiary of the Company, also made representations in favour of elimination of the foreign ownership restrictions on cable television companies. A similar submission had been made by the Company in February of 2002 to the Standing Committee on Canadian Heritage urging the removal of restrictions on foreign ownership applicable to cable television companies. On April 28, 2003, the Standing Committee on Industry, Science and Technology released a report to Parliament in which it recommended the removal of all Canadian ownership requirements applicable to telecommunications common carriers, which would include wireless carriers such as RWI and entities such as the Company that have a direct or indirect interest in such carriers. This report also recommended that any changes made to the Canadian ownership requirements for telecommunications common carriers be extended to cable television companies, such as RCCI. However, a second report issued by the Standing Committee on Canadian Heritage in June, 2003, has expressed concerns that changes in ownership restrictions for either telecommunications common carriers or cable television companies could have an adverse impact on the Canadian broadcasting system. Given these conflicting reports, the Government of Canada has indicated that it will try to reconcile the conflicting recommendations prior to taking any legislative action. This reconciliation process is currently underway. It is not yet known whether the Government of Canada will decide to amend the Telecommunications Legislation to relax or eliminate the restrictions on either wireless carriers (such as RWI) or cable television companies (such as RCCI) that distribute broadcasting services and provide internet and other telecommunications services to the public.

Item -7.3 — Ratings

Since November 8, 2004, Moody's Investors Service rated RCI's public senior unsecured debt B3 with a Corporate Family Rating of Ba3. The ratings for the senior secured and senior subordinated public debt of each of Cable and Wireless were Ba3 and B2 respectively. All ratings had a stable outlook. On October 31, 2005, Moody's placed all of the Rogers public debt ratings under review for a possible upgrade. On February 17, 2006 Moody's increased the ratings on all of the Rogers public debt. The Corporate Family Rating was increased to Ba2. The rating for the public senior secured debt of each of Cable and Wireless was increased to Ba2 while the rating for the senior subordinated public debt at Wireless was increased to Ba3. All of these ratings have a positive outlook. There are no ratings for RCI senior unsecured debt, Cable senior subordinated debt or Telecom senior secured debt since all such debt had been repaid prior to the ratings revision by Moody's on February 17, 2006.

On October 27, 2005, Standard & Poor's Ratings Service revised its outlook on all of the Rogers public debt to positive from stable. This was the only change in the ratings since they were lowered by Standard & Poor's on November 8, 2004. RCI's corporate credit rating is BB with a rating for public senior unsecured debt of B+. The rating for senior secured public debt of Cable and Wireless is BB+ and BB respectively while the rating for senior subordinated debt for each of Cable and Wireless is B+.

The credit ratings assigned by Fitch Ratings on the Wireless senior secured and senior subordinated public debt have not changed since November 12, 2004. They are BB+ and BB- respectively, with a stable outlook. On June 10, 2005 Fitch affirmed the Wireless ratings and initiated coverage of RCI and Cable. Cable's senior secured and senior subordinated public debt was assigned the same ratings as those of Wireless while RCI senior unsecured debt was rated BB-. All ratings have a stable outlook.

Credit ratings are intended to provide investors with an independent measure of credit quality of an issue of securities. Ratings for debt instruments range from AAA, in the case of S&P and Fitch, or Aaa in the case of Moody's, which represent the highest quality of securities rated, to D, in the case of S&P, C, in the case of Moody's and Substantial Risk in the case of Fitch, which represent the lowest quality of securities rated.

The credit ratings accorded by the rating agencies are not recommendations to purchase, hold or sell the rated securities inasmuch as such ratings do not comment as to market price or suitability for a particular investor. There is no assurance that any rating will remain in effect for any given period of time or that any rating will not be revised or withdrawn entirely by a rating agency in the future if in its judgment circumstances so warrant.
