Offer your employees the best mobile apps while ensuring data security

Secure and provision your devices using Rogers Mobile Device Management solutions

Rogers Mobile Device Management solutions include Mobile Device Management, White-Label Enterprise App Store (App Store) and app provisioning components. Your Mobile Device Management solution manages, monitors, secures and supports mobile devices regardless of location and service provider. Featuring over-the-air distribution of applications, data and configuration/security settings, Rogers Mobile Device Management solutions work on a broad array of devices including mobile phones, smartphones, tablets, terminals and ruggedized mobile devices.

Leverage the App Store and provisioning as a way to manage and introduce new applications, mobile device policy and security for your enterprise. By offering applications through your custom App Store, you gain the ability to implement policy and control and protect data and configuration for all mobile devices. Creating a Mobile Device Management solution with Rogers frees your end-users to perform at their best wherever, whenever, and with whatever device they want and reduces downtime, support costs and business risks.

WHY CHOOSE ROGERS FOR MOBILE DEVICE MANAGEMENT?

CUSTOMIZATION
Brand your App Store so you can be proud to put it on all your employee phones.

SIMPLICITY
Offload the administration of deployment, maintenance and support of your mobile applications.

SECURITY
Protect critical information with industry leading toolsets and platforms.

CUSTOMER CARE
Enterprise class mobility help desk available 24x7.

EFFICIENCY
Lower mobility costs with outsourced mobility services.

SCALABILITY
Be comfortable knowing your solution will to grow as you do.
