

Rogers Voice with Skype for Business Online

Enable voice and collaboration in one easy-to-use solution

Get business-grade telephony in the cloud with Rogers Voice with Skype for Business Online

Today's mobile work force is using a variety of products and services to stay connected, work across devices and simplify their professional lives. For most companies, telephony, e-mail, instant messaging, audio conferencing, video and web conferencing and other group communication tools remain disconnected.

Rogers Voice with Skype for Business Online is a fully-integrated, cloud-based voice and collaboration business solution that connects people virtually anywhere, anytime, across devices—all with one phone number. When combined with Microsoft Office 365, it integrates all your communication needs to provide seamless collaboration, enhanced workforce productivity and simplified voice infrastructure management.

Enable your workforce to:

Work virtually anywhere

Whether your teams are in the office or on the go, Rogers Voice with Skype for Business works simply and securely wherever your teams have an internet connection. With Rogers LTE Network, you can rely on powerful cellular coverage that delivers consistently fast internet connectivity.

Work across devices

Rogers is the first in Canada to provide full telephony features with Office 365 that allows users to place and receive calls from one number—from your desktop/laptop, tablet or smartphone. Works on Windows PCs, Macs, Windows Phone, iOS and Android devices.

Work the way they want

Now, your teams can integrate all their communication needs in one easy-to-use application, making it easy to switch between various types of communication and stay connected to customers, partners and suppliers. All it takes is one click to call any contact from a desktop, smartphone or tablet.

Rogers Voice with Skype for Business Online is easy to manage

Eliminate the responsibility of on-premises server software

Now, businesses can control the collaboration services they offer users, without the operational burden of on-premises server hardware.

With monthly service plans, Rogers Voice with Skype for Business supports multiple office locations simultaneously, while reducing complexity and increasing flexibility and manageability – all with predictable costs and low maintenance of the cloud.

Seamless integration with Office 365

Enjoy simplified implementation, administration and peace of mind knowing that your software is always up-to-date.

- Single user interface to purchase and administer with role-based access control.
- Single sign-on with on-premises Active Directory.
- 99.9% financially-backed SLA.

Built-in geo-redundancy in regional data centers.

One phone number, many features

Provide your employees with a single number that works whether they're at their desks or on the road. Rogers fixed line and full mobile number unification and portability reduces the complexity of managing multiple numbers, services or locations.

In partnership with:

Rogers Voice with Skype for Business Service ("Service") is subject to a recurring monthly service fee and a total of 44,640 minutes available in a 31-day period. Purchase of compatible hardware equipment and downloading /installing Rogers Voice with Skype for Business applications on your device(s) (available online or at applicable APP stores) required. Refer to the Rogers minimum system and browser requirements at Materials/Rogers.com for details. Service does not support 0+ or operator assisted calling (including, without limitation, collect calls, third party billing calls, 900 or calling card calls), may not support 3-1-1, 5-1-1 and/or other n11 calling (other than certain specified dialing such as 9-1-1 and 7-1-1), in one or more (or all) service areas. Service is a best commercial efforts service, with no guarantee of quality of service related to voice connectivity on account of its reliance on public internet and/or mobile cellular data networks. Quality of voice connectivity depends on internet bandwidth speeds. Refer to the Rogers recommended bandwidth speeds in the Materials for more details. Distribution of unsolicited voicemail, broadcast and instant messages prohibited. Any such use may cause an immediate termination of your services by Rogers. Important 9-1-1 limitations: Service must be connected to the internet in order to make or receive 9-1-1 emergency calls. User must also be signed into their Rogers Voice with Skype for Business account with correct username and password to place or receive a 9-1-1 emergency call. For technical reasons, functionality of 9-1-1 emergency calls through the Service may cease or be curtailed in various circumstances, including but not limited to: power outages, services outage, suspension or disconnection of your Services due to billing issues, network or Internet congestion, or network or Internet outage. Recommended to keep an alternative phone service handy to increase reliability of access to emergency services during any service interruption. For full Terms and Service of the program, visit rogers.com/terms. **1.** Rogers Voice with Skype for Business is subject to a monthly recurring fee. When using Rogers Voice with Skype for Business Services to make an outgoing voice call to any Canadian phone number from anywhere around the world, Customer will not incur additional airtime, pay-per-use, overage or Long Distance charges. You will also not incur any additional airtime, pay-per-use, overage or Long Distance charges for receiving an incoming voice call from anywhere around the world. However, any internet service charges, data usage charges and overage rates (if applicable) will apply in accordance with your Rogers or third party internet service package and/or smartphone data package or plan being used to access the Rogers Voice with Skype for Business Services. **2.** Your Rogers Voice with Skype for Business voicemails or instant messages will be stored and saved in your Microsoft Office 365 Outlook account. You are responsible for storing any voicemail messages, any call-log information and/or other communications maintained or transmitted by Rogers Voice with Skype for Business Services.
